## **DETAILED ACTION**

### ***Drawings***

1. The drawings are objected to because figure 2 is illegible. The shading of the graph makes reading the axis impossible. A new figure 2 is required.

### ***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 4-6, 10-12 and 16-18 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claims 4-6, 10-12 and 16-18, numerous variables are undefined (lacking a range, if the variable is an integer, what the variable represent, etc.). examples of these variables are 'h', "H", "N", "I", "BB" and "D". Correction is required.

### ***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

Art Unit: 2631

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-18 are rejected under 35 U.S.C. 102(b) as being anticipated by Sonoda et al (US 4,441,184).

Regarding claims 1, 4-7, 10-13 and 16-18, Sonoda discloses a method of interleaving data. Data words are interleaved so that all of the data words will be separated by one or more blocks on the carrier (column 1, lines 37-55). This data is transmitted to a receiver (column 3, lines 1-25).

Regarding claims 2, 8 and 14, the interleaved data is received and de-interleaved (column 3, lines 1-25).

Regarding claims 3, 9, 15, the de-interleaved data is interpolated to corrected an errors which may have occurred (column 3, lines 13-20).

### ***Conclusion***

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Abe (US 6,272,123) discloses, in figure 1, interleaving data to be transmitted and a receiver of receiving the interleaved data and interpolating the data to remove errors (column 6, lines 55-67).
